Senior Frontend Developer

Ledger Bennett Milton Keynes, England, United Kingdom (Remote)

Are you looking to progress your career and learn new skills with a progressive forward-thinking agency?

We have a new opportunity available for an enthusiastic, frontend developer to develop great UIs for our clients. We know that the world of web development is a creative place, and we're looking for someone full of ideas who are excited about what they do and are eager to make their mark and take their career to the next level.

With ever more creative ways to build, design, and market websites, it's more essential than ever for us to find talented, creative, and innovative individuals who take their craft seriously.

In this role you will:

- Develop medium to large-scale web and mobile websites and experiences.
- Create engaging interfaces for our clients
- Manage complete website lifecycles from conception to launch
- Keep up-to-date with modern web trends and make suggestions for improvement of the company online activities

Hit apply if you:

- Have experience with or eager to lean CRMs like HubSpot, Eloqua or Marketo (any other CRM work is applicable)
- Have a portfolio you can show off clearly showing your flair for UI development
- A solid understanding of semantic HTML5 and CSS3
- Have knowledge of CSS pre-processors (Primary: SASS/SCSS)

- A strong understanding of jQuery & client-side JavaScript as well as the latest frameworks (ideally React)
- Are comfortable working with API's and everything around them
- Possess a good understanding of how CMS's work
- Find Adobe Create Suite or Sketch a place of fun
- Understand how to make a function piece of software look and feel beautiful
- Are in a place of comfort with Hands-on development translating design concepts to HTML, accessibility, compatibility, and performance
- Front-End development: 3+ years (Required)
- React JS experience 2+ years (Optional)
- Agency experience 1+ years (Optional)

It would also be good, but not essential that you:

- Can evaluate system specifications against business requirements.
- Have knowledge working with hosting platforms like Microsoft Azure and AWS
- Have experience of task runners (ideal gulp)
- Have used package managers such as NPM and Yarn
- Have a good design eye and are happy to put that to work with the design team
